

STRIKE-SHIELD PRO

CREATOR DEFENSE

2026 Community Edition

: The Silent Crisis (The Stats)

The Silent Crisis (The Stats)

- The Data: In 2026, **1.2 million accounts** are restricted daily.
- The Truth: **90%** of "Permanent Bans" are actually "Bot-Loop Errors."
- The Cost: **Creators have lost \$14 Billion** in 2025 due to un-appealed strikes.

The 3 "Invisible" 2026 Triggers

- **Linguistic Symmetry:** AI flags you if your captions sound too much like a standard ChatGPT prompt.
- **Visual DNA Fingerprinting:** Posting the same "Viral Clip" everyone else is using leads to a "Reused Content" shadowban.
- **Metadata Stagnation:** Using the same hashtags for 7 days straight drops your **CHR (Creator Health Rating)** by 40%.

The 24-Hour "Trust Reset" Protocol

- Stop Activity: 24 hours of zero app usage to clear the behavioral cache.
- Originality Injection: Post 15 seconds of raw camera footage (no music) to prove human identity.
- Metadata Scrub: Rename your video files from video1.mp4 to descriptive, human names.

How Strike-Shield Pro Helps

- Links to your Free Scanners.
- Introduction to the \$29 Recovery Kit and AI Bible.
